

4 short puppet video plays a project by **Libby Hague**

free radicals

This project is part of **too cool for school**, an art and science fair inspired and curated by **Sally McKay** which was part of Fresh Ground new works, Harbourfront Centre's national commissioning programme. From that fair, several projects have been developed for the upcoming group exhibition and within that exhibition will be free radicals, this project by Libby Hague.

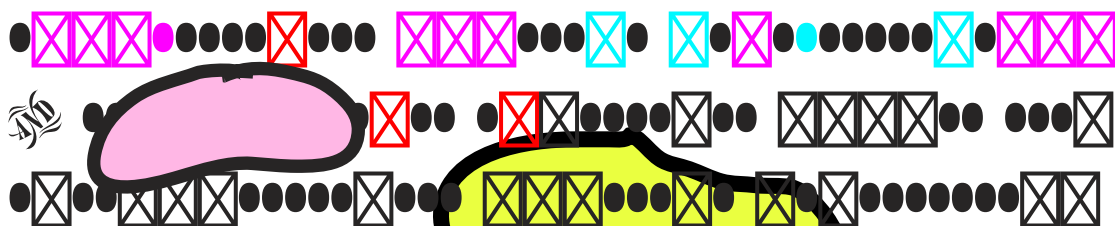

Elements with free radicals are unstable and reactive and one of the ways that new forms are created in nature. Mimicking this restless molecular activity will be four puppet plays developed on the "creation of life" theme.

The exhibition will be at York Quay Centre, main gallery, Harbourfront Centre
235 Queens Quay West
Toronto, ON, Canada M5J 2G8

Dates:
Saturday, November 13 - Sunday, Jan. 02, 2010
